TOYOTA TSUSHO AMERICA, INC.
BIODIVERSITY GUIDELINES

1. **Basic approach**

   We recognize the importance of biodiversity, and will seek to conserve biodiversity from both a global and long-term perspective.

2. **Contributing through the creation of new businesses**

   When creating new businesses, we will aim to ensure that biodiversity can be maintained alongside our business activities by implementing risk assessment and clarifying traceability.

3. **Cooperating with society**

   We will seek to create collaborative relationships with governments, international organizations, NPOs, suppliers, customers and a wide range of other groups that work to ensure biodiversity.

4. **Information disclosure**

   We will disclose our voluntary biodiversity initiatives alongside our corporate activities, and share the results of these initiatives and the monitoring results with society; in this way, we intend to contribute to the development of sustainable societies.

Takashi Hirobe
